Mounting system

- Suitable for post-top mounting.
- Flange with a hole (28 mm) at the centre for mounting to the support.

Materials

- Sheet in aluminum.
- Die-cast aluminum (UNI EN 1706).
- Hot galvanized steel tube (UNI EN ISO 1461) and galvanized steel sheet.
- Acrylic screen (PMMA).
- Screws in stainless steel and brass.

Structure - Main components

- Upper tilting frame for access to optical and wiring compartment, composed by a bell in die-cast aluminum and a visor in sheet aluminum with two small knobs for opening.
- Lower frame composed by a circular element in die-cast aluminum for the support of the reflector and screen, and a element with two arms in hot galvanized steel predisposed with a hole (28 mm) for mounting on the support.
- Wiring plate in galvanized steel sheet, easily removable.
- Neoprene gasket between upper and lower frame.
- Screen hemisphere shape in acrylic (PMMA) transparent or frosted finish.
Shock resistance IK06.

Optics

- Reflector mod. 1 - street lighting - Installation on the side of street.
- Reflector mod. 9 - pedestrian-cycle path and mixed areas lighting.
Installation on the side of street.

Operations and maintenance

- To opening the light fixture and access to wiring and optic compartment, loosen the two small knobs on cover and rotate it.
- To replace the lamp, rotate the support of lampholder on the reflector and pull out.
- During maintenance operations, no part or component is detached from the structure.
- During installation, follow the instructions for the correct optic orientation on the support.
- Periodic maintenance (about once a year) for external cleaning of the structure and screen from dust and smog, and the control of fastening of all screws, must be performed with light fixture switched off and cold.

Painting

- Standard color is metalized matt dark gray, type Neri.
- The ring for support of reflector and screen is white color.
- Other colours of RAL range on request.
- Information about paint steps used on this product in specific technical sheet.
