Operations and maintenance

- To open the light fixture and to access to the wiring and optic compartment, simply push the two clips springs and rotate the upper frame.
- Automatic disconnector when opening the light fixture.
- Electric auxiliaries individually replaceable.
- During maintenance operations, no part or component is detached from the structure.
- During installation, follow the instructions for the correct optic orientation on the support.
- Periodic maintenance (about once a year) for external cleaning of the structure and screen from dust and smog, and the control of fastening of all screws, must be performed with light fixture switched off and cold.

Painting

- Standard color is metalized matt dark gray, type Neri.
- Other colours of RAL range on request.
- Information about paint steps used on this product in specific technical sheet.

Note: how to complete the full code (Light fixture + support)

- To complete the configuration of the light fixture, add the code 4006.330.001 or the code 4006.330.002 of the supports, to the code of light fixture.
