Optics

- Reflector mod. 1 - street lighting - Installation on the side of street.
- Reflector mod. 9 - Asymmetric for cycle-pedestrian lighting. Installation on the side of street.

Operations and maintenance

- To opening the light fixture and access to the lamp, wiring and optic compartment, loosen the a small knob on cover and rotate the upper frame.
- Automatic electrical disconnecter when opening.
- During maintenance operations, no part or component is detached from the structure.
- Electric auxiliaries individually replaceable.
- During installation, follow the instructions for the correct optic orientation on the support.
- Periodic maintenance (about once a year) for external cleaning of the structure and screen from dust and smog, and the control of fastening of all screws, must be performed with light fixture switched off and cold.

Painting

- Standard color is metalized matt dark gray, type Neri.
- Other colours of RAL range on request.
- Information about paint steps used on this product in specific technical sheet.
