

Product description  
Truncated conical litter bin in hot-dip galvanised steel. Truncated conical steel support column. Inner polyethylene container.

Series description  
The Carya series is characterised by a conical tube with an angled end element. This aesthetic characteristic defines many of its products: bollard, ashtray, litter bin, clock, notice board and bus shelter. The shape of Carya products matches the Chara lighting system.

Dimensions	
Length	
391 mm [1' 3 2/4"]	
Width	
530 mm [1' 8 3/4"]	
Height	
990 mm [3' 3"]	
Capacity	
30 l [7.93 gal]	
Weight	
22 kg [48.5 lb]	

Measurements in millimetres are rounded to the nearest quarter of the closest inch.

Components

The support is constituted of a truncated conical steel tube (lower diameter: 80mm [3"]; upper diameter: 60mm [2 1/4"]).

The end component is made of steel, with an inclined cut, and is fixed to the top of the support.

The truncated conical bin is made of steel sheet, 15/10mm [2/4"] thick. The bin is fixed to the support tube at two points: at the lower part by a bracket with a hinge, which allows it to rotate, making emptying litter easier; at the upper part by a lock system with key. A stainless steel cable prevents it from overturning. A truncated conical container made of polyethylene is inserted into the bin.

The lid is made of 3mm [1/8"] thick steel sheet welded to the support tube.

The ashtray is made of aluminium, with removable inner container in stainless steel, and is fixed to the support with two stainless steel M6 screws.

Materials

- S235J steel UNI EN 10219-1

See the specific descriptions on the painting cycles of the materials that make up the product.

Finishes

The standard colours are:

- Neri Grey

Other colours are available upon request.

Installation

See product installation guides.
