

#### Product description

Truncated conical litter bin in hot-dip galvanised steel. Truncated conical steel support column. Inner polyethylene container.

#### Series description

The Carya series is characterised by a conical tube with an angled end element. This aesthetic characteristic defines many of its products: bollard, ashtray, litter bin, clock, notice board and bus shelter. The shape of Carya products matches the Chara lighting system.

#### Dimensions

##### Length

391 mm [1' 3 2/4"]

##### Width

494 mm [1' 7 2/4"]

##### Height

990 mm [3' 3"]

##### Capacity

30 l [7.93 gal]

##### Weight

20 kg [44.09 lb]

Measurements in millimetres are rounded to the nearest quarter of the closest inch.

#### Components

The support is constituted of a truncated conical steel tube (lower diameter: 80mm [3"]; upper diameter: 60mm [2 1/4"]).

The end component is made of steel, with an inclined cut, and is fixed to the top of the support.

The truncated conical bin is made of steel sheet, 15/10mm [2/4"] thick. The bin is fixed to the support tube at two points: at the lower part by a bracket with a hinge, which allows it to rotate, making emptying litter easier; at the upper part by a lock system with key. A stainless steel cable prevents it from overturning. A truncated conical container made of polyethylene is inserted into the bin.

The lid is made of 3mm [1/8"] thick steel sheet welded to the support tube.

#### Materials

- S235J steel UNI EN 10219-1

See the specific descriptions on the painting cycles of the materials that make up the product.

#### Finishes

The standard colours are:

- Neri Grey

Other colours are available upon request.

#### Installation

See product installation guides.
