

## Compliance

CE certificated post, compliant with standard UNI EN 40-5.

## Description

Lamp post made in cast iron (UNI EN 1561) and steel (UNI EN10219-1), hot-galvanized to UNI EN ISO 1461 standards.

Corresponding in shape, size and ornamentation to the diagrams, which are an integral part of the specifications.

Tapered post (A) in steel with a circular cross-section, suitable for flange fixing (diam. 341 mm - thickness 20 mm) on a foundation plinth (P).

The post is made up of 3 tubes welded together at their junctions (B), with dimensions: diam. 168 x 1500 mm - diam. 140 x 2500 mm - diam. 114 x 2400 mm.

It is provided with an M10 earthing bolt;

a slot (D - height 186 x 45 mm) for the installation of a Class II insulation terminal board.

The pole at the upper end is equipped with 6 grains M10 (Z) for fixing the top.

1°) Base element made in cast iron, height 1660 mm, with a circular plinth (diam. 550 mm, height 220 mm), surmounted by a cyma recta, a scotia (D), a torus (E) decorated with a braided design, and a scotia (F). The central section of the base has an inspection hatch (130 x 320 mm, effective 120 x 260 mm). It is tapered (lower diam. 330 mm, top diam. 225 mm, height 700 mm) and is decorated with twelve projecting vertical bands (G). The top section of the base has a torus (H) decorated with sixteen ovoli, a scotia (I), a torus (L) in the form of a laurel wreath, a scotia (M), a torus (N) decorated with sixteen ovoli, and a cove (O) that forms a junction with the cylindrical post (A). The base is cast as a single piece.

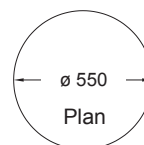

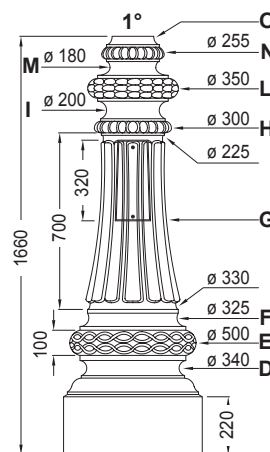

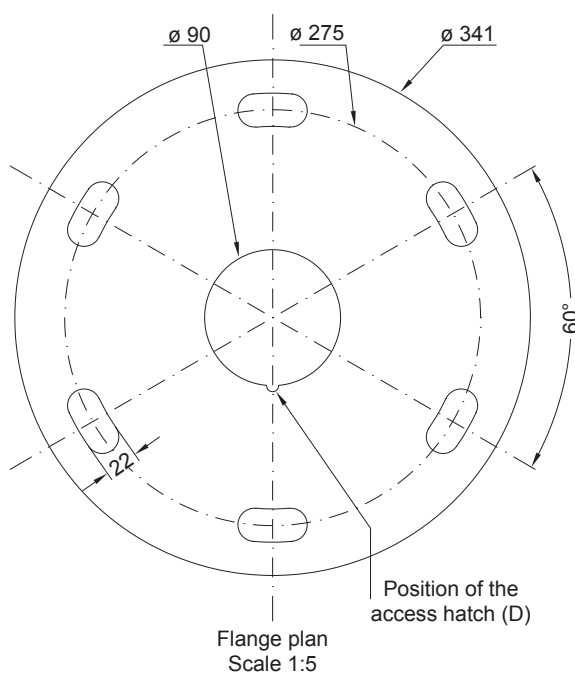

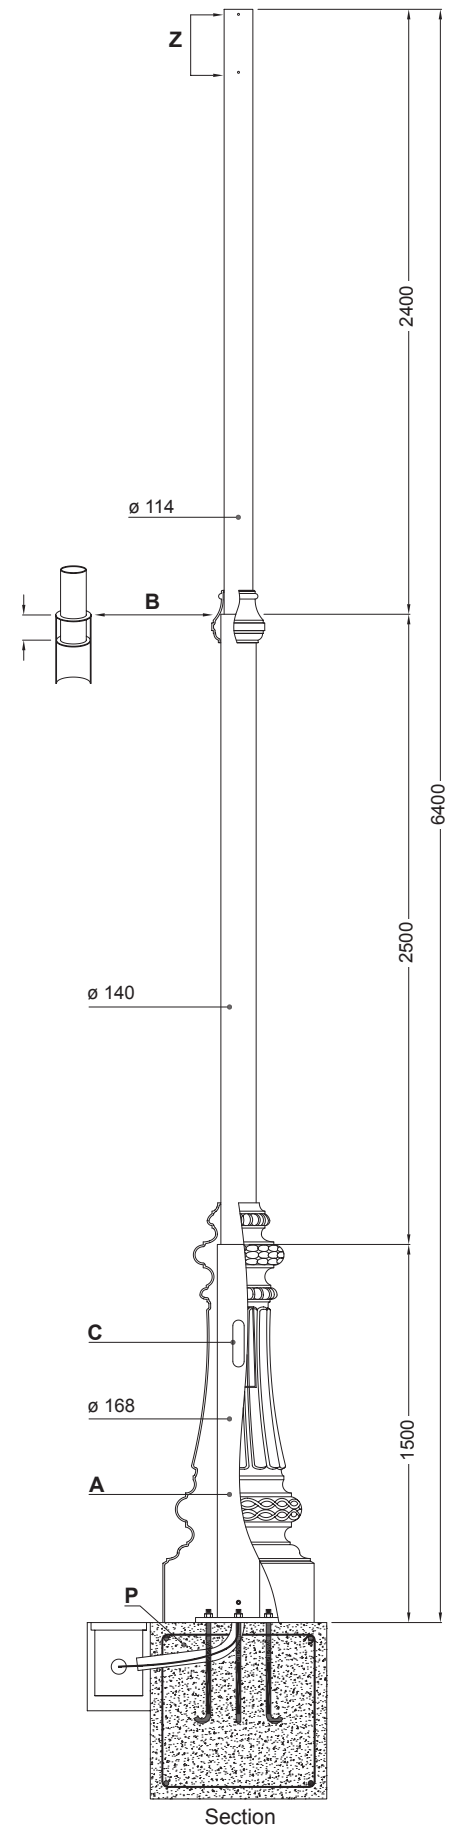

2°- 3°) Cast iron decorative junctions to be fitted at the points where the post narrows (B). Shape and size are as shown in the diagram.

The total height up to the second junction is 6400 mm.

The total weight is 298 Kg.

## Protection of surfaces

Please refer to the specification on painting procedures of the materials.
