

**Description of article 0001.202**

Lamp-post made of S275J steel, hot-rolled without welding, hot-galvanized in compliance with standard UNI EN ISO 1461, all corresponding to drawing in terms of various shapes, measurements and mouldings.

The post comprises the following:

- 1°) two steel posts to be inserted 80 cm into a foundation plinth (P); one post is equipped with a M10 screw for grounding marked with a special plate, a slot (C - h. 18.6 x 4.5 cm) for assembling insulation class II terminal boards with or without fuses (mod. Conchiglia), a hatch (D) made of aluminium die-casting for closing the slot (C) with protection rating IP 54, a slot (B - h. cm 15 x 5,0) positioned 17 cm below ground level for routing cables inside. The two posts (A - low. diam. 16.8 cm - upp. diam. 6.0 cm) are joined at the base using three M10 stainless steel screws. The top end is closed by two plastic plugs (F);
- 2°) a 162 cm long hot-galvanized steel curved tube (diam. 6.0 cm) ready to be fastened to the two posts (1°) using two M10 stainless steel screws (G), with hole in the centre for routing electric cables.
- 3°) a hot-galvanized steel fitting made for fastening the light fixture, with 3/4" GAS thread, to be applied to the centre of the tube (2°) via two stainless steel screws M10 (E).

The overall height of the post is 802 cm.

The light fixture fitting is at a height of 728 cm.

**Protection of surfaces**

Please refer to the specification on painting procedures of the materials.
