

Compliance

CE certificated post, compliant with standard UNI EN 40-5.

Description

Modular post in UNI EN 1561 cast iron with core in S235J UNI EN 10219-1 steel, hot-galvanized to UNI EN ISO 1461 standards, corresponding in shape, size and ornamentation to the diagrams, which are an integral part of the specifications.

The core (A) is made up of five tubes of different cross-sections, according to the internal diameter of the cast iron elements (diam. 13.3 x 170 cm - diam. 8.9 x 136 cm - diam. 7.6 x 90 cm - diam. 6.0 x 70 cm - diam. 4.2 x 20 cm), welded together at their junctions (B). The core must project perfectly vertically for a distance of 70 cm into a foundation plinth (P). It is provided with an M10 earthing bolt, a slot (D, height 18.6 x 4.5 cm) at the level of the inspection hatch in the base element in cast iron, suitable for the installation of a Class II insulation terminal board with or without fuse (Conchiglia), a slot (E - height 15.0 x 4.0 cm) set 35 cm below the paving level for leading cables into the core, and at the top a 1-1/4" thread (F) with reduction (G, 1-1/4" GAS - 3/4" GAS) and a galvanized steel tube (H) with a 3/4" GAS thread used to secure the various cast iron elements by means of a nut, and to attach the light fixture. A heat-shrink sheath (C), minimum height 20 cm and made from composite materials (irradiated polyolefinic and butylic mastic), must be applied to the core to protect it from corrosion. The cast iron post is made up of a number of elements that are fitted over each other so as to prevent water infiltration. The elements are as follows:

- 1°) Base element height 96 cm, with a circular plinth (I, diam. 40 cm, height 10 cm) surmounted by a torus (L, diam. 40 cm) and a tapered central section 58.5 cm high (M - lower diam. 36 cm, N - top diam. 20 cm) with an inspection hatch (12 x 28 cm). The top of the element is composed of a band (O, diam. 29.5 cm) decorated with sixteen ovoli and surmounted by a scotia (Q, diam. 15.5 cm) and a torus (R, diam. 22 cm).
- 2°) Second element height 106 cm, decorated at the base for a height of 26 cm with four leaves (S, diam. 22 cm). The upper part of the element is tapered (lower diam. 13.5 cm, top diam. 12 cm), and is decorated with sixteen flutes, a torus (T, diam. 15 cm) and four rosettes (U).
- 3°) Third element height 106 cm, tapered (lower diam. 12 cm, top diam. 10.5 cm) and decorated with a torus at the bottom (V, diam. 15 cm).
- 4°) Fourth element height 107.5 cm, tapered (lower diam. 10 cm, top diam. 8.5 cm) and decorated with a torus at the bottom (W, diam. 13 cm).
- 5°) Fifth element height 27.5 cm, round and decorated at the bottom with a torus (X, diam. 11 cm) and four leaves (Z). The top of the element is composed of a tapered section (lower diam. 19 cm, top diam. 5.5 cm).

The above elements are all cast as single pieces.

The total height of these first five elements is 440 cm.

Protection of surfaces

Please refer to the specification on painting procedures of the materials.

NOTE: The measurements are in centimetres.
