

Description

The top section is made in UNI EN 1563 nodular cast iron and FE 360 UNI EN 10219-1 steel, hot-galvanized to UNI EN ISO 1461 standards and corresponds in shape, size and ornamentation to the diagrams, which are an integral part of the specifications.

The top section is composed as follows:

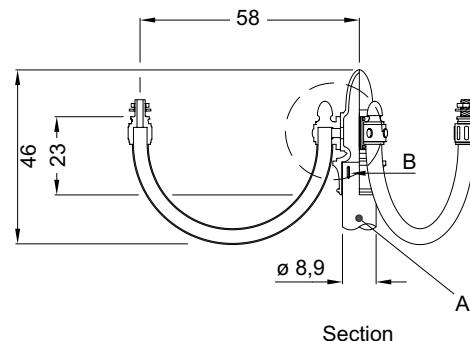

- 1°) An element in nodular cast iron and steel cast, height 34 cm, with three junctions for brackets at 120° to each other. The element is positioned on the core (A, diam. 8.9 cm) and is secured with an M10 stainless steel bolt (B) and two M8 stainless steel grubscrews.
- 2°) Three brackets, each with protrusion 56 cm and height 35 cm, made up of a steel tube (C, diam. 4.2 cm, curve radius 24 cm) and two elements (D, E) in nodular cast iron, entirely hot-galvanized. At the outer end of each bracket is a 3/4" GAS threaded tube with nut and rose in stainless steel (E) for attaching the light fixture. Each bracket is secured to the first element with four M8 stainless steel bolts.

The total protrusion of the assembled bracket for the attachment of the light fixture is 58 cm.

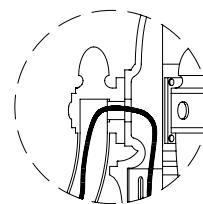

The effective height of the top section is 46 cm

Protection of surfaces

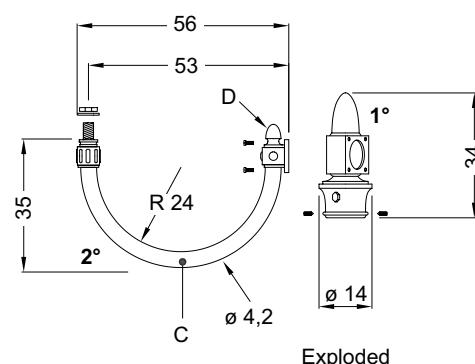

Please refer to the specification on painting procedures of the fixture's materials.
