

### Description

The top section is made in UNI EN 1561 cast iron, UNI EN 1563 nodular cast iron and FE 360 UNI EN 10219-1 steel, and corresponds in shape, size and ornamentation to the diagrams, which are an integral part of the specifications.

The top section is composed as follows:

- 1°) A tapered cast iron element (lower diam. 17 cm, top diam. 12.5 cm, height 55 cm) decorated with leaves and flutes.
  - 2°) A ring in hot-galvanized steel to support the suspension bracket.  
The suspension bracket is secured to the ring with M8 stainless steel screws, and the ring is fixed to the core (A) with two M8 stainless steel screws.
  - 3°) A ring in hot-galvanized steel to support the suspension bracket. The ring has a hole (B, diam. 1.8 cm) for the passage of the power supply cable. The suspension bracket is secured to the ring with M8 stainless steel screws, and the ring is fixed to the core (A) with two M8 stainless steel screws.
  - 4°) A suspension bracket, height 128 cm, with a total protrusion when assembled of 83 cm. Structurally the bracket is composed of an steel tube (diam. 4.2 cm), decorations (D, E, F, G) in cast iron and support attachments (C) in nodular cast iron. The entire assembly is hot-galvanized. The bracket is secured to support rings 2° and 3° with four M8 stainless steel screws, and at the outer extremity there is a junction (H) in nodular cast iron with a 3/4" GAS thread for attaching the light fixture. The power cable passes out of the top section of the core (A) and enters the bracket through the upper support ring (C), passing inside element 3° (L).
  - 5°) Two decorative elements in cast iron. Each element is secured with two M8 stainless steel screws to support rings 2° and 3°.
  - 6°) A column in hot-galvanized steel fixed to element 3° with four M6 stainless steel screws (I).
  - 7°) A cast iron finial element (height 20 cm - lower diam. 11 cm) decorated with two tori and a sphere. The finial is fitted onto element 5° and is secured with three M8 stainless steel screws (E).
- The total height of the top section is 272 cm.

### Protection of surfaces

Please refer to the specification on painting procedures of the materials.
