

**Use**

Suitable support for suspended light fixtures.

**Materials**

Made in UNI EN 1561 cast iron, UNI EN 1563 nodular cast iron and S235J UNI EN 10219-1 steel, hot dip galvanized according to UNI EN ISO 1461.

**Protection of surfaces**

Please refer to the specification on painting procedures of the materials.

**Dimensions and weight**

Height 150 cm; width 75 cm.

Weight 27 Kg.

**Description**

The top section is made up of the following elements:

- 1°) A hot-galvanised steel tube height 158 cm (diam. 6 cm) for the coupling on the posts with 10.2 cm of diameter; it is provided of a flange (A - diam. 7.5 cm - thickness 0.5 cm) and a hole (diam. 2 cm) for the passage of power supply cable.
- 2°) Cast iron junction cast in a single piece, height 17.5 cm, with two rings (diam. 14.5 cm), surmounted by a tapered section.
- 3°) A ring in hot-galvanised steel for lower support of the suspension bracket. It is secured to the supporting tube (1°) with two M8 stainless steel grubs.
- 4°) A ring in hot-galvanised steel for upper support of the suspension bracket. The ring has a hole (diam. cm 1,8) for the passage of power supply cable. It is secured to the supporting tube (1°) with two M8 stainless steel grubs.
- 5°) A suspension bracket height 101 cm, with a protrusion of 77 cm. Structurally the bracket is composed of a tube in steel (diam. 4,2 cm.) and support attachments (B) in spheroidal cast iron. The entire assembly is hot-galvanised. The suspension bracket is fixed to the support rings 3° - 4° with four screws M8 in stainless steel. The suspension bracket has at his end an internal thread 3/4" GAS for attaching the light fixture (C). The power cables pass inside the suspension bracket.
- 6°) A terminal element in cast iron drill shaped, height cm 26 (diam. lower than 10 cm.). This element is inserted on the central tube (1°) of suspension bracket and fixed with three M6 stainless steel screws.
