The renovated Promenade of Ostas Street in Ventspils is opened to visitors with a wide view of the river Venta, the sea gate, the old workshops of the port, an impressive collection of buoys and the exhibited pilot ship “Rota”. Until the middle of the 20th century there were located harbour warehouses or so called „spīķeri”. The newly opened section of Ostas Street leads from the “Winter Port” to the Captain’s Office of Ventspils Port and winds along the historic port workshops, which for many years, due to the high fence and added buildings, obscured the view of the historic buildings. Great design with amazing team work!

I lampioni del Sistema Chara abbelliscono e illuminano la nuova Promenade di Ostas Street a Ventspils in Lettonia. Il nuovo Lungomare ora offre ai visitatori un ampio scorcio sul fiume Venta, sulle antiche officine del porto, su una bellissima collezione di boe e sulla nave pilota “Rota”. Il tratto appena aperto di Ostas Street si snoda lungo le storiche officine portuali, che per molti anni, a causa dell’alta recinzione non erano visibili. Grande design con un fantastico lavoro di squadra!
